PROFESSIONAL EXPERIENCE

Taazaa Tech Private Ltd. | Noida India

Software Engineer   Oct '23 - Present

In current company my role as a software developer to create REST Api's for frontend team

- **Integrated third-party APIs** to enhance application functionality and improve user experience, aligning with market demands for trip management and claim processing.
- Implemented **RabbitMQ** for asynchronous communication between microservices, optimizing system efficiency and resource utilization.
- Demonstrated proficiency in various backend technologies, including **SQL** and **NoSQL** databases, ensuring robust data management and retrieval.
- We are responsible for presenting our work to US based client on weekly basis ensuring product feature and functionalities. Experience in working in agile methodology.

Taazaa Tech Private Ltd. | Noida India

Associate Software Engineer   Oct '22 - Oct '23

In current company my role as a associate software developer to create graphical interface using createjs. We modified createjs library as per our requirements.

- For frontend web pages we are using reactjs to create modular and reusable components. Where we handle user interactions, and optimising performance for smooth UI.
- We follow OOPs principal to write clean and maintanable code.
- We achieved no failure in 2 year of time our production is always working.
